

RAMAC GPR Rough Terrain Cart (RTC)

Terraplus is pleased to announce the release of the Rough Terrain Cart (RTC) option for the Easy Locator.

Previously only available with the popular RAMAC/GPR series, the RTC option for the Easy Locator increases the operational capabilities of this user-friendly system by allowing its use over more rugged terrain.

The larger diameter wheels provide much more ground clearance than previously available, whilst the self-adjusting antenna tray ensures that the antenna stays in contact with the ground surface for optimal signal performance.

Existing Easy Locator users can purchase the RTC as an add-on to their existing system. Alternatively, the Easy Locator can be purchased in a new standard RTC configuration.
